SUMMARY: This 10th edition of the standard text in automotive mechanics covers today's newest developments in automotive design, construction, operation, diagnosis, and service. "The updates continue to reflect the increasing complexity of the automobile. A careful student of this text will find that it will be a valuable tool in the maintenance professional's toolbox for many years." -- Automotive Industries. Determination of molybdenum in some commercially important paints by hydride generation atomic absorption spectrometry. The determination of molybdenum in commercial paints by hydride generation atomic absorption spectrometry was investigated. There was satisfactory agreement between the results obtained by hydride generation atomic absorption spectrometry and by flame atomic absorption spectrometry. The results obtained were suitable for the development of quality control procedures for samples of paints. f678ea9f9e
